Question 3: [_____ / 2 points]

Consider the following HTML document, and find the terms within this document that help in achieving accessibility. There are 6 main terms, so write at least 2 of them in the below table with the reasons.

Line #	HTML Document
1	<html>
2	<head>
3	<style>
4	h3 { font-size: 2.5rem; }
5	</style>
6	</head>
7	<body>
8	<header>
9	Midterm Exam Table
10	
11	</header>
12	<main>
13	<div>
14	Here is the list of the <abbr title="Information Technology">IT</abbr>courses in week 2
15	<p class="cl"> Hint: All exams will be taken from 3 to 5</p>
16	< r>
17	<dl>
18	<dt>Monday</dt>
19	<dd>IT 328</dd>
20	<dt>Thursday</dt>
21	<dd>IT 426</dd>
22	</dl>
23	</div>
24	</main>
25	</body>
26	</html>

Line #	Term	Reason
12	<main>	<main> used to show the primary content of the document, which may help screenreader
10	alt	alt used to describe the image using words which help to know the image even if the browser doesn't support
14		it's show the most important, serious, agent content

Question 4: [_____ / 2 points]

Complete the following HTML document so that it contains an ordered list with a lower-alpha numbering system (as inline style) of two items: ice cream and frozen yogurt. Each ordered list item should contain a nested, unordered list of your favorite flavors. Provide two flavors in each unordered list. Use the circle marker for the unordered lists (inline style). The below figure shows an example of the output.

- alphanet ←
- a. Ice cream

 - o Pistachio
 - o Hazelnut

(b) Frozen yogurt

 - o Chocolate Chip
 - o Raspberry
- circle ←

list-image

```
<!DOCTYPE html>
```

```
<html>
```

```
<head>
```

```
<title>Page Title</title>
```

```
</head>
```

```
<body>
```

```
<ol style="list-style-type: lower-alpha">
```

```
<li style="list-style-type: lower-alpha">
```

Ice cream

```
<ul style="list-style-type: circle">
```

```
<li>Pistachio</li>
```

```
<li>Hazelnut</li>
```

```
</ul>
```

```
</li>
```

```
<li>Frozen yogurt</li>
```

```
<ul style="list-style-type: circle">
```

```
<li>Chocolate Chip</li>
```

```
<li>Raspberry</li>
```

```
</ul>
```

```
</li>
```

```
</ol>
```

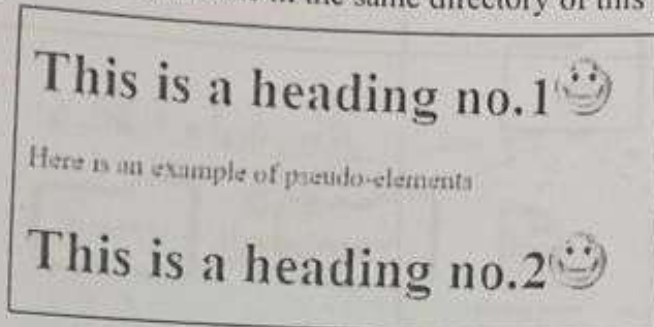

```
</body>
```

```
</html>
```

Question 5: [_____ / 2 points] ☆

⋮ After
⋮ Before
⋮ First - letter
line

Complete the following HTML document by adding the CSS style rules that use pseudo-element select to insert some content before and after the content of an element, as shown in the below figure. Assume the image file name is smiley.gif, and it is available in the same directory of this HTML document.

```
<!DOCTYPE html>
```

```
<html>
```

```
<head>
```

```
<style>
```

```
h1::after {
```

```
content: "smiley.gif";
```

```
Content: url (Smily.gif);
```

```
}
```

```
</style>
```

```
<h1::before {
```

```
content: "This is";
```

```
}
```

```
</h1>
```

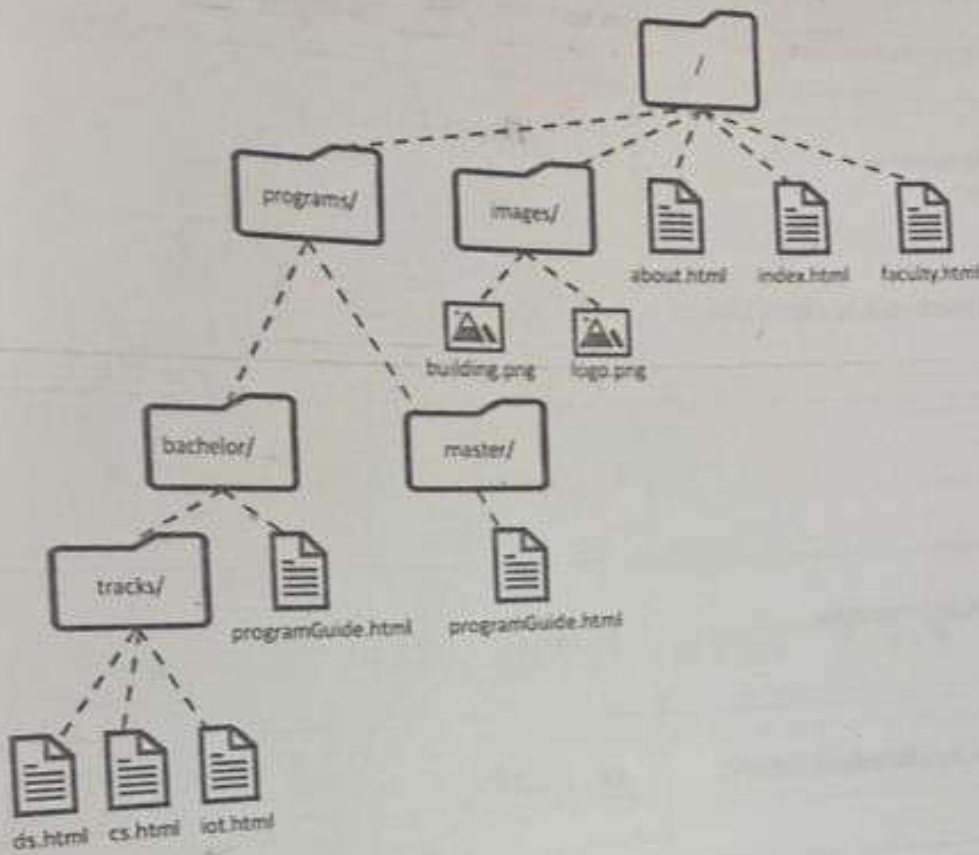

```
</style>
```

```
</head>
```

```
<body>
```

```
<h1>a heading no.1</h1>
```

Consider the following site structure for a website (it.ksu.edu.sa) for our department: / 3.75 points] ★

a) Write the relative pathnames for URL of the pages in the following table, without using site root relative paths: / 2 points]

#	Current Document	Web Page to link	Relative Pathname
1.	index.html	cs.html	Programs/bachelor/tracks/cs.html
2.	index.html	faculty.html	Faculty.html
3.	iot.html	about.html	../.../about.html
4.	programGuide.html for bachelor degree	programGuide.html for master degree	../.../master/programGuide.html ✓

b) Write the site root relative path for logo.png / 0.75 point]

/images/logo.png ✓

c) Write the absolute path for ds.html / 1 point]

https://Programs/bachelor/tracks/ds.html X

http://it.ksu.edu.sa/programs/bachelor/tracks/ds.html
